Ms. Pittiporn Sripipat
Assistant to Motor Claims Director Krungthai Panich Insurance Co., LTD

My vision problem began when I was about 40 years old. I spent a fair amount of time using computer and laptop every day. Beginning to notice the symptom of having blurry image, I rushed to an optical place nearby and got myself a pair of eyeglasses made. However, I found them useless. Then, I got another pair made, but again, they were not very accommodating. I kept changing my eyeglasses because none of them were able to live up to my expectation.
